even though the performance difference is negligible and optimized out in many cases please take note that it s still good practice to use `i` instead of `i++` there s absolutely no reason not

the way for loop is processed is as follows

- 1 first initialization is performed $i = 0$
- 2 the check is performed $i \leq n$
- 3 the code in the loop is executed
- 4 the value is incremented

5 repeat steps
