the book examines ideas about the making and shaping of greenland s society environment and resource spaces it discusses how greenland s resources have been extracted at different points in its history shows how acquiring knowledge of subsurface environments has been crucial for matters of securitisation and explores how the country is being imagined as an emerging frontier with vast mineral reserves the book delves into the history and contemporary practice of geological exploration and considers the politics and corporate activities that frame discussion about extractive industries and resource zones it touches upon resource policies the nature of social and environmental assessments and permitting processes while the environmental and social effects of extractive industries are considered alongside an assessment of the status of current and planned resource projects in its exploration of the nature and place of territory and the subterranean in political and economic narratives the book shows how the making of greenland has and continues to be bound up with the shaping of resource spaces and with ambitions to extract resources from them yet the book shows that plans for extractive industries remain controversial it concludes by considering the prospects for future development and debates

on conservation and indigenous rights with reflections on how and where greenland is positioned in the geopolitics of environmental governance and geo security in the arctic this book will be of great interest to students and scholars of environmental anthropology geography resource management extractive industries environmental governance international relations geopolitics arctic studies and sustainable development

with the constitution of 1953 the colonial status of greenland came to an end and greenlanders were granted equal rights as citizens within the danish realm in 1954 this new arrangement was supported by the un general assembly the decision to change greenland s status was conditioned both by internal and external circumstances in the un context danes increasingly felt the strain of being a colonial power and they feared the possibility of future un interference in greenlandic affairs

why have foreigners over the centuries kept wanting to own greenland the fascinating calamitous story of the many who ve tried and uniformly failed an indispensable guide to greenland why it matters and how it could become the next global flashpoint ever since its discovery greenland has been a frontier for human exploration empire and geostrategic competition this book delves into that rich history and complex politics revealing how a country of just 56 000 inhabitants 80 of which is above the arctic circle has shaped and been shaped by the world elizabeth buchanan s short history begins with erik the red and the vikings greenland s first colonizers whose settlement of over 2 000 people mysteriously disappeared she explores the island s evolution from a danish possession into an autonomous territory and its role in the world war ii when soldiers from the u s helped greenland s 15 man army operating on dogsleds capture nazis trying to set up secret remote surveillance outposts she details how greenland became a strategic hot spot in the cold war arms race between the u s and russia when the u s built a nuclear powered base under the greenland icesheet and president kennedy devised project iceworm a plan to deploy 600 ballistic ice hidden missiles there finally she dissects greenland s position today at the center of a new great game featuring cold war belligerents the u s and russia and now china and the mounting domestic pressures for independence not to mention president trump s agenda to acquire the landmass buchanan poses provocative yet compelling scenarios for greenland s future providing an essential read for anyone curious about this frozen frontier and its place on the world stage

this book is about greenland s rapidly changing role in the world and about it s complex connections to denmark its former colonizer it is about greenland s possible secession from the kingdom of denmark oil uranium and the difficulties that greenlanders and danes often have when they try to talk about their common past and greenland s place in the new global future the first part of this book builds on my travels and encounters with greenland s politicians fishermen schoolteachers and intellectuals including my old classmate from maniitsoq who became a very wise vicar in her hometown and now appears in chapter 3 through all these conversations i learned just how dramatic the present wave of changes in greenland are never before did i understand just how complex the desire for increased independence is or how dramatic the clashes between old and new are or how volcanic the debate over which path to choose for the future can be an insight into these

local discussions is surely a prerequisite if one wants to understand the broader discussion about greenland s future relations to denmark and its changing role in the world the second part deals with hard core politics about mining and oil and about the rest of the world s including china s interest in greenland s oil gas uranium rare earths gold and other riches this part of the book grapples with the political in fights in greenland and with the power struggles between denmark and greenland over resources foreign policy and identity legally for half a century greenland has been part of the kingdom of denmark but also increasingly a very self conscious one of the sort my observations flow from my work as a journalist in greenland and denmark over the past years where i worked for the danish broadcasting corporation and other media outlets i am danish i lived only two years in greenland as a teenager but i have come there often in later years my errand is not to forward any opinion on greenland s position as a part of the danish realm nor do i pass judgment on the popular vision of future secession if anything i hope to throw light on the complexities involved and to encourage more people to take part in this important debate by providing detail real human beings facts and observations from places that would for most people outside greenland be somewhat cumbersome to reach
